# MyAmici

Control, Compliance, and Complete Traceability for GMP Labs

MyAmici delivers GMP inventory control ensuring regulatory defensibility, and end-to-end traceability. From inbound inspection to FEFO and batch tracking, every workflow is controlled, documented, and compliant with the standards required for materials entering human use.

MyAmici is the world's only configurable SaaS GMP inventory and purchasing system with a fully traceable environment built for regulated operations. Every inbound material, movement, test, label, and approval is captured in a secure audit trail designed for FDA, MHRA, and 21 CFR Part 11 expectations.

Key Features

Materials Inbound Inspection Records
Configurable material specifications and inbound inspection tests ensure no item enters GMP stores unless it meets your defined quality and compliance standards.

Fully Validated System
Supported by a full validation pack and on-site IQ/PQ assistance. Customers routinely achieve CSV readiness quickly, with the platform successfully supporting FDA and MHRA inspections.

Integrated Purchasing → GMP Inventory
Purchasing and inventory run in a single workflow. Every transaction — from order to issue is traceable and guaranteeing end-to-end data integrity across R&D and GMP operations.

How It Works

1. **Holistic Consultation:** We begin by understanding your quality, operational, and financial requirements.

2. **Workflow Mapping & Configuration:** Your operation is broken into controlled workflows, and the platform is configured to match your defined processes.

3. **Validation Strategy Review:** We guide your validation approach, sharing best practices for efficient, inspection-ready CSV.

4. **Configuration, Data Upload & Sign-Off:** Data, workflows, permissions, and controls are configured and walked through for approval.

5. **Go-Live Training & Hypercare:** Teams are trained on day one, with intensive support until GMP processes are fully embedded.

6. **Customer Success:** Ongoing reviews ensure optimal configuration and continuous compliance.

7. **You Get the Insights:** Access live valuation, activity logs, FEFO data, audit records, reallocation reports, and custom dashboards.

The Value

- ✓ Ensure full regulatory compliance with a validated, inspection-ready system
- ✓ Strengthen quality with risk-managed, repeatable inbound testing
- ✓ Guarantee only approved materials enter GMP via specification-driven quarantine
- ✓ Achieve total traceability with GMP labels, FEFO, and batch/lot control
- ✓ Unifying GMP inventory and purchasing in one workflow
- ✓ Maintain defensibility with complete audit logging and electronic signatures

Why MyAmici

MyAmici is the only configurable SaaS platform globally offering a validated GMP inventory and purchasing system — built specifically to meet the standards of regulated manufacturing and testing.

We give you:

- **Configurable material specifications** and inbound testing
- **Automatic quarantine-to-release** workflows
- **Bills of Materials and FEFO picklists** for planned production
- **GMP labelling** with batch, expiry, and lot tracking
- **Full audit logging** with original values retained

- **Role-based permissions** and secure e-signatures
- **A comprehensive validation pack** supporting IQ/OQ/PQ
- **Purchasing and inventory** in one validated environment
- **Expert support** from consultation to inspection readiness

The Result

A compliant, controlled GMP environment with total traceability — ensuring reduced regulatory risk, and creating defensible processes that withstand FDA, MHRA, and Part 11 scrutiny.
