

Smart, Seamless Procurement for Labs

MyAmici is a platform and service designed to manage all your lab procurement, from pipettes to purification systems, in one controlled, compliant, and efficient process.

MyAmici combines software and service to give biotech and life sciences organizations a single, standardized process for managing scientific spend.

Key Features

Unified Purchasing Workflow

Run all purchases — consumables, equipment, and CapEx through one optimized process. Generate POs in seconds.

Configurable Approvals & Controls

Custom finance and HSE checks are embedded at every step, ensuring safe, compliant, and auditable purchasing.

Procurement-as-a-Service

A dedicated team supports sourcing, supplier setup, and contract negotiation — giving you enterprise-grade procurement without adding headcount.

System Integrations

Integrate with ERP, finance, and MES tools for seamless data flow, automated order processing, and real-time supplier lead times.

Spend Visibility

Monitor supplier performance, track spend by category, and benchmark costs with data-backed insights that drive continuous improvement.

How It Works

- 1. Proactive sourcing and pricing negotiations:** MyAmici specialists compare suppliers, negotiate pricing, check availability, and secure the best scientific and commercial fit.
- 2. Order Request:** Scientists and lab managers choose from 20M+ pre-negotiated products or submit a custom request for our team to source.
- 3. Approval:** Requests move automatically through the approval flows you define - from finance to HSE to department heads.
- 4. Purchase & Tracking:** One-click order placement. POs auto-generate, send directly to suppliers, and track through delivery.
- 5. Delivery:** Real-time supplier updates. We chase late items, manage issues, and keep your team informed every step of the way.
- 6. Invoice Match:** Three-way match ensures accurate reconciliation and smooth month-end closes.

The Value

- ✓ Save 20–30% from day one, driven by continuous re-tendering, price optimization, and representative basket benchmarking
- ✓ Reduce purchasing time by up to 50%, freeing scientists to focus on the science, not admin
- ✓ Strengthen compliance with embedded finance and HSE controls
- ✓ Centralize spend data for audit readiness and investor transparency
- ✓ Scale smoothly with purchasing workflows that evolve as your lab grows from start-up to GMP

Why Amici

MyAmici isn't a generic procurement platform, it's a biotech-built purchasing engine backed by a team that knows the science, the suppliers, and the pressure of running a lab.

We give you:

- **Unrivalled buying power** across one of the worlds largest biotech and life sciences supplier networks
- **65+ scientific procurement specialists** acting as an extension of your team
- **Impartial supplier advice**, grounded in benchmarked performance data
- **Enterprise capability** without enterprise overhead
- **A single integrated platform** spanning purchasing, inventory, GMP, and equipment
- **Guaranteed ROI**, with savings exceeding our transaction fees

The Result

A smarter, safer, faster way to buy — one that protects budgets, accelerates research, and brings order to the operational chaos scientists deal with every day.
